About

I'm 25, from São Paulo - Brazil. I have been working with Game Development for over 7 years, developing on Game Engines mainly. More than 2 years of experience in VR/AR development. Fascinated by learning new things and responding to new challenges. Passionate about technology and playing/making unique games! Looking forward to new experiences!

Experience

• Lead Programmer and Project Manager

Digital Key (Freelance)

Main activities: Develop Digital Architectural Models, VR applications, Android and iOS Apps, interactive totem's applications, among many others digital solutions. Using Unity 3D (C#) and Unreal (Blueprint and C++) to find the better solution for many clients like DIRECIONAL ENGENHARIA, Cyrela, Even, Cassio GShock, Vertiv, and others.
