São Paulo, Brazil | <https://www.linkedin.com/in/feecr/> | feecrodrigues@gmail.com |

Portfolio: <https://feecr.github.io/>

Professional Summary

Creative and technically skilled Game Developer with 8+ years of experience designing and building interactive experiences using Unity, Unreal, and AR/VR technologies. Known for solving problems creatively, adapting quickly to new challenges, and collaborating across global teams. Passionate about developing unique games and immersive experiences that blend art and technology.

Core Skills

- Unity (C#)
- Unreal Engine (Blueprints & C++)
- AR/VR Development (3+ years)
- Game Architecture (SOLID Principles)
- Git / Version Control
- Firebase Integration
- REST APIs
- Jenkins / CI
- Agile / Scrum
- Python, HTML, CSS
- AI-Assisted Tools

Languages

Portuguese – Native

English – Advanced (C1)

Professional Experience

Mugic (Freelance / Independent Contractor) – Game Developer

São Paulo, Brazil | Aug 2025 - Nov 2025

- Worked as a Unity developer, contributing to an unreleased mobile pool game.
- Developed robust gameplay systems in Unity and C#, including advanced physics logic, shot prediction, collision handling, and trajectory simulation.
- Implemented backend integrations (REST APIs), handling authentication, data synchronization, and remote communication.
- Built and maintained multiplayer features using Photon PUN, including room creation, player synchronization, connection stability, and matchmaking logic.
- Diagnosed and resolved critical bugs, optimized performance, and ensured consistent physics behavior across mobile devices.
- Improved overall project structure by organizing assets, refining architecture, and maintaining clean, scalable code.
- Collaborated directly with product stakeholders, managing deadlines and delivering features within tight time constraints.

Globant – Game Developer (SSr & Jr)

São Paulo, Brazil | Aug 2021 – Apr 2025

- Developed interactive AR experiences embedded in mobile apps using Unity & Flutter.
- Led video/media integration tools, researching and implementing third-party SDKs.
- Contributed to a mobile NBA game (LiveOps), integrating assets and managing game data.
- Implemented ad systems for casino-style mobile games, improving engagement tracking.
- Built a VR diagnostic tool for Meta devices to test tracking, haptics, and sensors.
- Collaborated across time zones, presented solutions directly to clients and stakeholders.

Digital Key – Lead Programmer & Project Manager

São Paulo, Brazil | Jun 2018 – Jul 2021

- Delivered immersive VR/AR applications, virtual tours, and mobile apps using Unity and Unreal.
- Managed technical teams and project timelines, ensuring delivery to top-tier construction clients.
- Developed interactive totems and architectural visualizations for marketing and real estate.

8e7 Mídias Interativas – Interactive Media Developer

São Paulo, Brazil | Apr 2018 – Feb 2019

- Built custom mobile and touchscreen applications using Unity and Firebase.
- Connected real-time mobile systems to desktop-based data processing applications.
- Focused on tourism and events sector digital solutions.

Main Leaf – Unity Developer (Junior)

São Paulo, Brazil | Jun 2017 – Sep 2017

- Contributed to two mobile games for Android and iOS using C# in Unity.

- Worked closely with senior developers to meet client requirements.

Education

Fatec São Caetano do Sul – Antônio Russo

Bachelor of Technology in Digital Games Development

São Paulo, Brazil | Jan 2014 – Jun 2017

Certificates

SOLID Principles: Software Architecture & Design, Sujith George – Udemy (2023)

Unreal Engine C++ Developer, GameDev.tv – Udemy (2023)
